We see so many friends who have done great achievements in their school life, in sports and in academics, but who are now wasting their lives just like that. We see so many people who already enjoyed victory is nowhere in light today.

Have you ever thought why this happens?

“GIVING UP”

You may find yourself alone, broken, unemployable, and quickly losing everything you had that you worked your entire life to earn. Despite going through hard times, just realize who you are? What you want to be in your life? What pushed you all these days?

You had dreams. You wanted to see success. You wanted to win.

Did you only dream or had a desire to pursue it.

If you didn't see any progress to your dream, it means you have already buried your dreams.

Do you know why you gave up?

You started finding excuses, you started blaming others, you started to listen to others who de-motivated you and most importantly, you started doubting yourself.

Here is what would have happened: You would have had a dream. In reaching for it, you would have faced many challenges, many failures and you would have said to yourself “Why bother, it is not worth the pain, better to quit and be happy where I am”.

The magical word or the mantra that I wanted to tell you at this situation is

NEVER
BELIEVE IN YOURSELF
NEVER
GIVE UP
