Course Content

- The Train the Trainer Experiential Forklift Simulator Operations (T3FSO) incorporates experiential learning principles, allowing trainers to engage in interactive, hands-on practice that reinforces their understanding of simulator operations. Participants will advance through a series of progressively complex tasks, including navigating a figure of "8" pattern to improve precision and spatial awareness and mastering ascending and descending ramps with and without loads, focusing on maintaining control and stability on inclines.

Further modules cover practical aspects of forklift operations, such as loading and unloading racks, moving pallets between containers and staging areas, and loading and unloading trucks. These exercises are designed to enhance trainers' ability to demonstrate and teach efficient and safe operational techniques effectively.
